- 36.5 In case of an abnormally high tender price, the Procuring Entity shall make a survey of the market prices, check if the estimated cost of the contract is correct and review the Tender Documents to check if the specifications, scope of work and conditions of contract are contributory to the abnormally high tenders. The Procuring Entity may also seek written clarification from the tenderer on the reason for the high tender price. The Procuring Entity shall proceed as follows:
- i) If the tender price is abnormally high based on wrong estimated cost of the contract, the Procuring Entity may accept or not accept the tender depending on the Procuring Entity's budget considerations.
 - ii) If specifications, scope of work and/or conditions of contract are contributory to the abnormally high tender prices, the Procuring Entity shall reject all tenders and may retender for the contract based on revised estimates, specifications, scope of work and conditions of contract, as the case may be.
- 36.6 If the Procuring Entity determines that the Tender Price is abnormally too high because genuine competition between tenderers is compromised (*often due to collusion, corruption or other manipulations*), the Procuring Entity shall reject all Tenders and shall institute or cause relevant Government Agencies to institute an investigation on the cause of the compromise, before retendering.

37. Post-Qualification of the Tenderer

g) Specific additional criteria (Not Applicable)

[Other specific additional criteria to be considered in the evaluation, and the evaluation method shall be detailed in TDS 34.6][If specific **sustainable procurement technical requirements** have been specified in Section VII- Specification, **either** state that (i) those requirements will be evaluated on a pass/fail (compliance basis) **or** otherwise (ii) in addition to evaluating those requirements on a pass/fail (compliance basis), if applicable, specify the monetary adjustments to be applied to Tender Prices for comparison purposes on account of Tenders that exceed the specified minimum sustainable procurement technical requirements.]

2.2.4. Multiple Contracts (ITT 33.4) -[Not Applicable]

Multiple contracts will be permitted in accordance with ITT 33.4. Tenderers are evaluated on basis of lot to lot basis and the lowest evaluated tenderer identified for each Item. The Procuring Entity will select one Option of the two Options listed below for award of Contracts.

OPTION 1

- i) If a tenderer wins only one Item, the tenderer will be awarded a contract for that Item, provided the tenderer meets the Eligibility and Qualification Criteria for that Item.
- ii) If a tenderer wins more than one Item, the tender will be awarded contracts for all won Items, provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the Items. The tenderer will be awarded the combination of Items for which the tenderer qualifies and the others will be considered for award to second lowest the tenderers.

OPTION 2

The Procuring Entity will consider all possible combinations of won Items [contract(s)] and determine the combinations with the lowest evaluated price. Tenders will then be awarded to the Tenderer or Tenderers in the combinations provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the item won.

2.2.5. Alternative Tenders (Not Applicable)

“A Tenderer may submit an alternative Tender only with a Tender for the base case. The Procuring Entity shall only consider the alternative Tenders offered by the Tenderer whose Tender for the base case was determined to be the Lowest Evaluated Tender.” **or**

“A Tenderer may submit an alternative Tender with or without a Tender for the base case. The Procuring Entity shall consider Tenders offered for alternatives as specified in the Technical Specifications of Section V, Schedule of Requirements. All Tenders received, for the base case, as well as alternative Tenders meeting the specified requirements, shall be evaluated on their own merits in accordance with the same procedures, as specified in the ITT 33.”

3. MARGIN OF PREFERENCE (Not Applicable)

- 3.1** If the TDS so specifies, the Procuring Entity will grant a margin of preference of 15% (fifteen percent) to Tenderers offering goods manufactured, mined, extracted, grown, and assembled or semi

processed in Kenya. Goods assembled or semi-processed in Kenya shall have a local content of not less than 40%.

- 3.2** The margin of preference will be applied in accordance with, and subject to, the following provisions:
- a) Tenderers applying for such preference on goods offered shall provide, as part of the data for qualification, such information, including details of the goods produced in Kenya, so as to determine whether, according to the classification established by the Procuring Entity, a particular category of goods or group of goods qualifies for a margin of preference.
 - b) After Tenders have been received and reviewed by the Procuring Entity, goods offered in the responsive Tenders shall be assessed to ascertain they are manufactured, mined, extracted, grown, assembled or semi- processed in Kenya. Responsive tenders shall be classified into the following groups:
 - i) **Group A:** Tenders offering goods manufactured in Kenya, for which (a) labour, raw materials, and components from within Kenya account for more than forty (40) percent of the Ex-Works price; and
(b) the production facility in which they will be manufactured or assembled has been engaged in manufacturing or assembling such goods at least since the date of Tender Submission date;
 - iii) **Group B:** All other Tenders offering Goods manufactured in Kenya;
 - iv) **Group C:** Tenders offering Goods manufactured outside Kenya that have been already imported or that will be imported.
 - c) To facilitate this classification by the Procuring Entity, the Tenderer shall complete whichever version of the Price Schedule furnished in the Tender Documents is appropriate. Incorrect classification may render the Tender non-responsive as no reclassification will be permitted after Tender opening. Tenderers shall provide correct information especially with respect to duties, taxes etc. paid on previously imported Goods and percentage of local labour, materials and components for Goods manufactured in Kenya as any false information which cannot be supported by documentation may render the Tender non-responsive besides other sanctions for providing falsified information.
 - d) The Procuring Entity will first review the Tenders to confirm the appropriateness of the Tender group classification to which Tenderers assigned their Tenders in preparing their Tender Forms and Price Schedules.
 - e) All evaluated Tenders in each group will then be compared to determine the lowest evaluated Tender of each group. Such lowest evaluated Tenders shall be compared with each other and if as a result of this comparison a Tender from Group A or Group B is the lowest, it shall be selected for the award.
 - f) If as a result of the preceding comparison, the lowest evaluated Tender is a Tender from Group C, all Tenders from Group C shall be further compared with the lowest evaluated Tender from Group A after adding to the evaluated price of goods offered in each Tender from Group C, for the purpose of this further comparison only, an amount equal to 15% (fifteen percent) of the respective CIP Tender price for goods to be imported and already imported goods. Both prices shall include unconditional discounts and be corrected for arithmetical errors. If the Tender from Group A is the lowest, it shall be selected for award. If not, the lowest evaluated Tender from Group C shall be selected as per paragraph (e) above.”

APPENDIX 1- FRAUD AND CORRUPTION

(Appendix 1 shall not be modified)

1. Purpose

1.1 The Government of Kenya's Anti-Corruption and Economic Crime laws and their sanction's policies and procedures, Public Procurement and Asset Disposal Act (*no. 33 of 2015*) and its Regulation, and any other Kenya's Acts or Regulations related to Fraud and Corruption, and similar offences, shall apply with respect to Public Procurement Processes and Contracts that are governed by the laws of Kenya.

2. Requirements

2.1 The Government of Kenya requires that all parties including Procuring Entities, Tenderers, (applicants/proposers), Consultants, Contractors and Suppliers; any Sub-contractors, Sub consultants, Service providers or Suppliers; any Agents (whether declared or not); and any of their Personnel, involved and engaged in procurement under Kenya's Laws and Regulation, observe the highest standard of ethics during the procurement process, selection and contract execution of all contracts, and refrain from Fraud and Corruption and fully comply with Kenya's laws and Regulations as per paragraphs 1.1 above.

2.2 Kenya's public procurement and asset disposal act (*no. 33 of 2015*) under Section 66 describes rules to be followed and actions to be taken in dealing with Corrupt, Coercive, Obstructive, Collusive or Fraudulent practices, and Conflicts of Interest in procurement including consequences for offences committed. A few of the provisions noted below highlight Kenya's policy of no tolerance for such practices and behavior:

- 1) a person to whom this Act applies shall not be involved in any corrupt, coercive, obstructive, collusive or fraudulent practice; or conflicts of interest in any procurement or asset disposal proceeding;
- 2) A person referred to under subsection (1) who contravenes the provisions of that subsection commits an offence;
- 3) Without limiting the generality of the subsection (1) and (2), the person shall be—
 - a) disqualified from entering into a contract for a procurement or asset disposal proceeding; or
 - b) if a contract has already been entered into with the person, the contract shall be voidable;
- 4) The voiding of a contract by the procuring entity under subsection (7) does not limit any legal remedy the procuring entity may have;
- 5) An employee or agent of the procuring entity or a member of the Board or committee of the procuring entity who has a conflict of interest with respect to a procurement:-
 - a) shall not take part in the procurement proceedings;
 - b) shall not, after a procurement contract has been entered into, take part in any decision relating to the procurement or contract; and
 - c) shall not be a subcontractor for the bidder to whom was awarded contract, or a member of the group of bidders to whom the contract was awarded, but the subcontractor appointed shall meet all the requirements of this Act.
- 6) An employee, agent or member described in subsection (1) who refrains from doing anything prohibited under that subsection, but for that subsection, would have been within his or her duties shall disclose the conflict of interest to the procuring entity;
- 7) If a person contravenes subsection (1) with respect to a conflict of interest described in subsection (5)(a) and the contract is awarded to the person or his relative or to another person in whom one of them had a direct or indirect pecuniary interest, the contract shall be terminated and all costs incurred by the public entity shall be made good by the awarding officer. Etc.

2.3 In compliance with Kenya's laws, regulations and policies mentioned above, the Procuring Entity:

- a) Defines broadly, for the purposes of the above provisions, the terms set forth below as follows:
- i) “corrupt practice” is the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence improperly the actions of another party;
 - ii) “fraudulent practice” is any act or omission, including misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain financial or other benefit or to avoid an obligation;
 - iii) “collusive practice” is an arrangement between two or more parties designed to achieve an improper purpose, including to influence improperly the actions of another party;
 - iv) “coercive practice” is impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party;
 - v) “obstructive practice” is:
 - deliberately destroying, falsifying, altering, or concealing of evidence material to the investigation or making false statements to investigators in order to materially impede investigation by Public Procurement Regulatory Authority (PPRA) or any other appropriate authority appointed by Government of Kenya into allegations of a corrupt, fraudulent, coercive, or collusive practice; and/or threatening, harassing, or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation; or
 - acts intended to materially impede the exercise of the PPRA's or the appointed authority's inspection and audit rights provided for under paragraph 2.3 e. below.
- b) Defines more specifically, in accordance with the above procurement Act provisions set forth for fraudulent and collusive practices as follows:
- "fraudulent practice" includes a misrepresentation of fact in order to influence a procurement or disposal process or the exercise of a contract to the detriment of the procuring entity or the tenderer or the contractor, and includes collusive practices amongst tenderers prior to or after tender submission designed to establish tender prices at artificial non-competitive levels and to deprive the procuring entity of the benefits of free and open competition.
- c) Rejects a proposal for award¹ of a contract if PPRA determines that the firm or individual recommended for award, any of its personnel, or its agents, or its sub-consultants, subcontractors, service providers, suppliers and/ or their employees, has, directly or indirectly, engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices in competing for the contract in question;
 - d) Pursuant to the Kenya's above stated Acts and Regulations, may sanction or debar or recommend to appropriate authority (ies) for sanctioning and debarment of a firm or individual, as applicable under the Acts and Regulations;
 - e) Requires that a clause be included in Tender documents and Request for Proposal documents requiring (i) Tenderers (applicants/proposers), Consultants, Contractors, and Suppliers, and their Sub-contractors, Sub-consultants, Service providers, Suppliers, Agents personnel, permit the PPRA or any other appropriate authority appointed by Government of Kenya to inspect² all accounts, records and other documents relating to the procurement process, selection and/or contract execution, and to have them audited

by auditors appointed by the PPRA or any other appropriate authority appointed by Government of Kenya; and

- f) Pursuant to Section 62 of the above Act, requires Applicants/Tenderers to submit along with their Applications/Tenders/Proposals a “Self-Declaration Form” as included in the procurement document declaring that they and all parties involved in the procurement process and contract execution have not engaged/will not engage in any corrupt or fraudulent practices.

¹ For the avoidance of doubt, a party's ineligibility to be awarded a contract shall include, without limitation, (i) applying for pre-qualification, expressing interest in a consultancy, and tendering, either directly or as a nominated subcontractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider, in respect of such contract, and (ii) entering into an addendum or amendment introducing a material modification to any existing contract. ² Inspections in this context usually are investigative (i.e., forensic) in nature. They involve fact-finding activities undertaken by the Investigating Authority or persons appointed by the Procuring Entity to address specific matters related to investigations/audits, such as evaluating the veracity of an allegation of possible Fraud and Corruption, through the appropriate mechanisms. Such activity includes but is not limited to: accessing and examining a firm's or individual's financial records and information, and making copies thereof as relevant; accessing and examining any other documents, data and information (whether in hard copy or electronic format) deemed relevant for the investigation/audit, and making copies thereof as relevant; interviewing staff and other relevant individuals; performing physical inspections and site visits; and obtaining third party verification of information.

PART 2: SUPPLY REQUIREMENTS

SCHEDULE OF REQUIREMENTS , TERMS OF REFENCES AND TECHNICAL SPECIFICATIONS

Rural Electrification and Renewable Energy Corporation (REREC) wishes to procure Supply and delivery of Geospatial Tools and Equipment's. The Corporation intends to procure the following items.

Brief description of the scope

This technical specification covers the supply, installation, and maintenance of modern geospatial, digitization, and field technology. It includes high-performance document scanners, portable printers, ruggedized Android tablets, solar power stations, and mobile internet connectivity. The scope also encompasses large-scale digitization of legacy geospatial records into searchable PDFs with defined metadata standards, quality control, and secure system integration, as well as a service contract for maintenance of existing geospatial hardware and the supply of essential field equipment to support data capture, processing, storage, and deployment.

LOT 1: SCOPE FOR SERVICE CONTRACT FOR MAINTENANCE FOR GEOSPATIAL TOOLS

The Scope includes:

i. Service Contract Management & Administration

- Provide a comprehensive **Annual Service Contract** for the maintenance of the Client's geospatial tool fleet.
- The contract shall explicitly cover **ten (10) Z6810 Plotters** and **nine (9) Large Format Scanners**. A complete asset list with serial numbers is provided in Appendix A.
- The contractor shall assign a dedicated Account Manager as the single point of contact for all service coordination, reporting, and contract administration.
- Invoices shall be issued **annually in advance**, with a clear, fixed price covering all services defined in this scope. No hidden costs or variable hourly rates shall apply for in-scope activities.

ii. Preventive Maintenance (PM) Services

- Execute **regular, scheduled Preventive Maintenance** visits for all covered equipment **once per quarter** (four times per contract year).

- The PM schedule shall be proposed by the contractor and mutually agreed upon with the Client at the start of the contract to minimize operational disruption.
- Each PM visit must include, as a minimum:
 - Thorough internal and external cleaning.
 - Inspection and calibration of all critical components (print heads, scanners, cutters, rollers).
 - Verification of firmware/software status and updates if required and approved by the Client.
 - Performance of diagnostic tests and print/scan quality checks.
 - Replacement of standard wearable parts (e.g., filters, maintenance kits, dust wipers) as part of the contract price.
 - Provision of a signed service report detailing work performed, parts replaced, equipment condition, and recommendations.

iii. Corrective & Breakdown Maintenance Services

- Provide unlimited **Corrective Maintenance** in response to equipment malfunction or breakdown for all covered equipment.
- The contractor must guarantee the following **Service Level Agreements (SLAs)**:
 - **Response Time:** Acknowledge service request within **2 business hours** of notification.
 - **On-site Attendance:** A qualified engineer shall be dispatched to the Client's site within **2 business days** for critical failures.
 - **Resolution Time:** Use **best efforts** to resolve issues on the first visit. For complex issues, a resolution plan with a clear timeline must be provided within 24 hours of diagnosis.
- All labor, travel, and diagnostics for corrective calls are included in the annual fee.
- **Remote diagnostics and troubleshooting** support shall be available during business hours.

4. Parts, Consumables, and Loaner Policy

- All **necessary spare parts and consumables** required to repair and maintain the covered equipment are included in the contract, **excluding user-replaceable items** such as ink cartridges, media, and toner.
- The contractor must maintain an adequate local stock of critical spare parts to meet the SLAs.

- In the event a covered machine requires depot repair or will be inoperative for more than **3 business days**, the contractor shall provide a **like-for-like loaner/relief machine** at no additional cost until the primary machine is restored.

5. Reporting, Training, and Documentation

- Provide a **detailed quarterly service summary report** covering: PM visits completed, corrective calls logged (with problem and resolution), parts used, equipment uptime/downtime analysis, and overall fleet health status.
- Conduct **one (1) annual training/refreshers session** for the Client's operators on basic operational best practices, minor troubleshooting, and consumables handling to minimize user-induced errors.
- Maintain and update a **service log** for each machine, to be available for Client review upon request.

General Requirements & Exclusions

1. The contract price must be all-inclusive for the specified services, parts, and SLAs. Any potential extra charges must be explicitly listed and pre-approved in writing by the Client.
2. Service exclusions typically include: damage due to accident, negligence, misuse, acts of God, power surges, use of non-approved consumables, or modifications made by unauthorized personnel.
3. All service engineers must be manufacturer-certified for the specific equipment models covered.
4. The contractor must provide proof of public liability and professional indemnity insurance.
5. The Client will provide a clean, safe, and accessible working environment with power and network access as needed for the service engineers.

LOT 2: SCOPE FOR DIGITIZATION & CONVERSION OF LEGACY GEOSPATIAL DATASETS

The Scope includes:

1. Document Inventory, Preparation, and Handling

- Process a total inventory of approximately 25,000 project files and 150,000 design map files. The physical documents are located across all regional offices, with approximately 80% of the archive housed at the Mombasa Road REREC offices. The final contract sum will be based on unit rates applied to the verified actual quantities, as detailed in the inventory log provided as Appendix A.
- A mandatory pre-bid familiarization visit to the primary archive at the Mombasa Road offices and a sample regional office is required. The purpose is to enable the tenderer to physically assess document condition, volumes, and the percentage mix of complexity categories (as defined in Appendix B) to inform an accurate bid. The client will facilitate access during a specified period.
- Prepare all documents for scanning through pre-processing, including but not limited to: careful removal of staples and paper clips, unfolding, minor repair of torn pages, sorting, and batching. A handling protocol for fragile or damaged items must be proposed.
- The scope encompasses documents and maps of varying complexities. The bidder must categorize sample documents (e.g., Simple Text, Complex Text with Figures, Oversized Maps, and Bound Volumes) and price accordingly, in line with the complexity definitions provided in Appendix B.
- The contractor shall plan for and manage the logistics of document handling across multiple regional locations, ensuring a secure and documented chain of custody is maintained at all times. A detailed Logistics and Security Plan and a Chain of Custody Plan must be submitted with the bid.

2. Digitization, Conversion, and Technical Output Specifications

- Convert all textual documents to **searchable PDF/A-2b format** using Optical Character Recognition (OCR). The OCR process must achieve a minimum character accuracy rate of **99.5%** across a representative sample.
- Convert all Design maps to PDF format, with color mode appropriate to the original. Large-format maps (exceeding A3) require specialized scanners and output must retain all visual detail.

- Scan all standard documents at a minimum optical resolution of **300 dpi**. Specifications for oversized materials will be confirmed post-survey.
- Apply appropriate color modes: **Bi-tonal (Black & White)** for clean text; **Grayscale** for documents with photographs or shading; **Color** for documents and maps where color is critical for information (e.g., signatures, stamps, color-coded designs).
- Perform post-scan image processing, including deskewing, cropping, and removal of black borders to ensure a clean, professional output.

3. Metadata Capture, Naming, and Folder Structure

- Capture and embed metadata into each digital file according to the **mandatory schema provided in Appendix C**. Fields include, but are not limited to: Project_ID, Region, County, Constituency, Document_Date, Document_Type, and Original_File_Reference.
- The source for metadata will be a combination of a master index (provided) and data extracted from marked cover sheets. The methodology for accurate capture must be detailed in the bid.
- Apply a standardized file naming convention to all outputs. The convention, to be finalized during the project kick-off, will follow the logic: **[Region]/[ProjectID]/[DocType]_[SequentialNumber].pdf**.
- Organize all digitized files into a folder hierarchy that **exactly replicates the logical structure of the original physical filing system**, as demonstrated in the sample structure provided in Appendix D. Any proposed deviations must be justified and approved.

4. Quality Assurance, Control, and Acceptance Protocol

- Implement a rigorous, two-tier Quality Control (QC) process:
 - Tier 1 (100% Check):** Every scanned image checked for completeness, correct sequence, legibility, and overall visual quality.
 - Tier 2 (Sampled Check):** A minimum of **10%** of files from each batch randomly sampled and verified for accuracy of metadata and OCR quality.
- Establish clear acceptance/rejection criteria. A batch with an error rate exceeding **0.5%** in the Tier 2 sample shall be rejected and must be fully reworked at the contractor's cost.
- Provide comprehensive QC reports for each batch, documenting checks performed, errors found, and corrections made.

5. Delivery, Storage, Security, and Handover

- Deliver all final digitized outputs on a **secure network drive / Document Management System (DMS)** as specified by the client. This includes all digital files, the complete file/folder structure, and a master database/index.
- Implement **role-based access control (RBAC)** on the delivered system in accordance with the client's security policy.
- Submit a detailed **Project Security Plan** with the bid, covering: physical security of processing facilities, secure transportation protocols, data encryption standards (for data in transit and at rest), and secure data erasure post-project.
- The handover process includes a **30-day Acceptance Testing Period** after final delivery. The client will test a random sample of **2%** of the total delivered collection, with a minimum sample of **500 files**, against the stated specifications. Final sign-off is contingent on zero critical defects and major defects not exceeding **0.5%** of the tested sample.

6. Training and Documentation

- Provide training for designated staff on the use of the retrieval system and the structure of the digitized archive.
- Deliver full project documentation, including: as-built inventory, data dictionary for metadata, QC summary reports, and a system operation guide.

General Requirements & Assumptions

- i. The contractor must conduct a mandatory pre-bid site survey to assess document conditions and volumes. Pricing must be broken down by pre-defined document complexity categories.
- ii. All pricing shall be on a firm unit rate basis (e.g., per page, per map, per metadata field) for transparency and scalability against the final verified count.
- iii. The contractor is liable for any loss or damage to original materials and must provide proof of relevant insurance.
- iv. A pilot phase for processing **1,000 files, representing a full spectrum of the complexity categories defined in Appendix B**, will be conducted before full-scale production. Approval of the pilot outputs against the full Acceptance Criteria in Section 5 is a mandatory precondition for authorizing the project to continue.
- v. The proposed project timeline must include all phases: mobilization, pre-processing, scanning, post-processing, QC, and delivery.
